

mPulse for Salesforce

The Power of mPulse's Engagement Console Available Natively in Salesforce

Activate healthcare consumers with a unified engagement management experience. mPulse for Salesforce makes digital communication with consumers effortless, driving increased engagement and improved outcomes.

Unlock Seamless Integration

Our engagement capabilities are readily available via the Salesforce user interface through one-step authentication and can be configured to meet your organization's needs.

Transform Consumer Experience

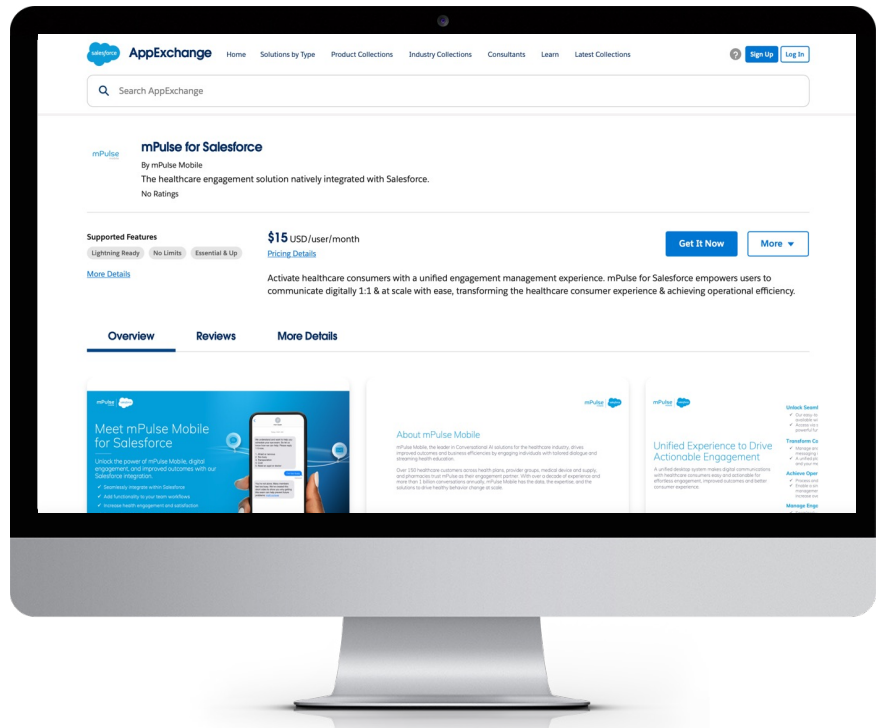

Deliver automated or personalized 1:1 messaging in real-time to your members, patients, or consumers. Gain valuable insights by using a single platform to manage inbound and outbound engagement.

Manage Engagement Effortlessly

A unified historic record of consumer conversations allows for complete transparency. Easily shift from automated conversations to live dialogues.

Achieve Operational Efficiency

Enable seamless mPulse to Salesforce member data syncing. Boost efficiency with significantly less manual work.

mPulse for Salesforce is now available in the AppExchange and integrated with Sales Cloud, Service Cloud, and Health Cloud.
