

PRODUCT OVERVIEW

FHIR API

Achieve compliance confidently with a turnkey solution that seamlessly integrates health plan data. By continuously monitoring CMS and HL7 FHIR standards, we keep you ahead of regulatory changes, turning compliance into a strategic advantage.

Streamline Interoperability with Turnkey APIs

Comply with evolving CMS Interoperability regulations while reducing costs and operational complexity. Our APIs enable:

- Regulatory Alignment – Full compliance with Patient Access, Provider Directory, Drug Formulary, Provider Access, Payer-to-Payer Exchange, and Prior Authorization APIs
- Secure & Scalable Connectivity – Facilitating real-time data exchange with third-party apps, EHRs, and payers
- Cost-Effective Implementation – Pre-built mappings reduce the burden of data transformation, accelerating time to compliance

Accelerate Implementation

We minimize additional data load by leveraging existing data within health plan portals, transforming it into FHIR-standard formats for exchange with third-party apps, provider EHRs, and other payers.

Stay on Top of Ever-Changing Regulations

mPulse is actively developing solutions for:

- Payer-to-Payer Data Exchange API – Streamlining member data transitions
- Prior Authorization APIs (CRD, DTR, PAS) – Automating prior authorization workflows to improve provider efficiency
- Future API Enhancements – Proactively adapting to upcoming CMS regulations

Features

CMS-9115-F FHIR APIs

- Patient Access API
- Provider Directory API
- Drug Formulary API

CMS-0057-F FHIR APIs

- Provider Access API
- Payer-to-Payer Exchange API
- Coverage Requirements Discovery (CRD) API
- Discovery Templates and Rules (DTR) API
- Prior Authorization Support (PAS) API

Standards

- Da Vinci
- CARIN Alliance
- US Core Implementation Guides (IGs)
- OpenID Connect
- OAuth 2.0
- Usage Reporting
